Statement US25/00000521

Greenhouse Gas Verification Statement

The inventory of Greenhouse Gas emissions in **01.07.2024 to 30.06.2025** of the company

TAPESTRY Inc.

10 Hudson Yards New York, NY 10001 United States.

has been verified in accordance with ISO 14064-3:2019 as meeting the requirements of

WRI/WBCSD GHG Protocol – A Corporate Accounting and Reporting Standard

For the following activities:
"Apparel & Fashion"

Location-based: 673,762 metric tonnes of CO2 equivalent (Scope 1, 2 and 3)
4,312 metric tonnes of CO2 equivalent for Scope 1
32,330 metric tonnes of CO2 equivalent for Scope 2 (location based)
637,120 metric tonnes of CO2 equivalent for Scope 3 (Categories 1,2,3,4,5,6,7,9,12,14,15)

Market-based: 641, 497 metric tons of CO2 equivalent (Scope 1, 2 and 3).
4,312 metric tonnes of CO2 equivalent for Scope 1
65 metric tonnes of CO2 equivalent for Scope 2 (location based)
637,120 metric tonnes of CO2 equivalent for Scope 3 (Categories 1,2,3,4,5,6,7,9,12,14,15)

Lead Auditor: Darlin Perez
Support Auditor: Milena Naranjo
Technical Review: Ursula Antunez de Mayolo
Statement date: 3 December, 2025

TAPESTRY Inc.

Brief Description of Verification Process
SGS has been contracted by TAPESTRY Inc. for the verification of direct and indirect carbon dioxide equivalent (CO_2e) emissions as provided by TAPESTRY Inc. in their GHG Statement in the form of a Greenhouse Gas Emissions Report covering CO_2e emissions.

Roles and Responsibilities
The Corporate Sustainability Department of TAPESTRY Inc. is responsible for the organization's GHG information system, the development and maintenance of records and reporting procedures in accordance with that system, including the calculation and determination of GHG emissions information and the reported GHG emissions. It is SGS' responsibility to express an independent GHG verification opinion on the emissions as provided in the TAPESTRY Inc.'s GHG Statement for FY2025 (01.07.2024 to 30.06.2025).

SGS executed a third-party verification according to the requirements of ISO 14064-3:2019 of the given GHG statement. The evaluation included reviewing documents and records, and interviewing staff virtually. The verification was based on the scope, objective and verification criteria of the agreement between TAPESTRY and SGS.

Level of Assurance
The level of assurance agreed is Limited.

Scope
TAPESTRY Inc. has commissioned an independent verification by SGS of reported CO_2e emissions arising from their operations, to establish conformance with the requirements of GHG Protocol within the scope of the verification as outlined below. Data and information supporting the CO_2 equivalent statement were historical in nature and projected; and proven by evidence. This engagement covers verification of emissions from anthropogenic sources of GHG included within the organization's boundary and meets the requirements of GHG Protocol.

- **Organizational boundary:** Operational Control Approach
- **Description of activities**: Sales of Apparel & Fashion
- **Locations included in the Verification:** Global Operations with HQ in USA. It includes Approximately 1,613 facilities, comprised 718 NA, 95 EMEA, 800 APAC. Retail stores, offices, fulfilment centres, warehouses, storages facilities.
- **Physical infrastructure, activities, technologies and processes of the organization:** Retail stores, offices, fulfilment centers, warehouses, storages facilities.
- **GHG sources included:**
  Scope 1 – Direct GHG emissions
  Stationary combustion & fugitives.
  Scope 2 – Indirect Emissions associated with electricity
  Emissions from imported energy: Purchased electricity and chilled water.
  Scope 3 - Other Indirect Emissions
  Category 1 Purchased Goods and Services
  Category 2 Capital Goods
  Category 3 Fuel- and Energy-Related Activities Not Included in Scope 1 or Scope 2
  Category 4 Upstream Transportation and Distribution
  Category 5 Waste Generated in Operations
  Category 6 Business Travel
  Category 7 Employee Commuting
  Category 9 Downstream Transportation and Distribution
  Category 12 End-of-Life Treatment of Sold Products
  Category 14 Franchises
  Category 15 Investments
- **GHGs included**: CO_2, N_2O, CH_4 and HFCs. There are no PFC, SF_6 or NF_3.
- **GHG information for the following period was verified**: FY2025 (01.07.2024 to 30.06.2025)
- **Global Warming Potentials** (GWPs): IPCC AR6.
- **Intended user of the verification statement**: Internal and general public.
- **Mitigation Activities:** Renewable Energy Purchased for Electricity Consumption. Tapestry purchased 105,746 MWh and allocated 85,797 MWh only to their power consumption (RECs, GOs, REGO) and 20,194 MWh of voluntary RECs through a third party that engages directly with the Utility companies in the deregulated energy markets to markets to negotiate renewable energy credits directly into the cost of Tapestry's utility bills.
- **GHG Emission reduction targets:** SBTi targets validated: Reduce absolute Scope 1 and 2 GHG emissions by 64% and Scope 3 GHG emissions 42% by FY2030 from a FY2022 base year, reduce absolute Scope 3 FLAG (Forest, Land and Agriculture) sector GHG emissions 30% by FY2030 from a FY2022 base year, Achieve net zero GHG emissions across the value chain by 2050.

TAPESTRY Inc.

Objective
The purposes of this verification exercise are, by review of objective evidence, to independently review:

- Whether the CO_2 equivalent emissions are as declared by the organization's GHG statement
- That the data reported are accurate, complete, consistent, transparent and free of material error or omission.

Criteria
The criteria against which the verification was carried out are the requirements of the WRI/WBCSD GHG Protocol – "Corporate Accounting and Reporting Standard and the GHG Protocol" and "Corporate Value Chain (Scope 3) Accounting and Reporting Standard".

Materiality
The materiality required of the verification was considered by SGS to be below 10% for limited level of assurance, based on the needs of the intended user of the GHG Statement.

Conclusion
TAPESTRY Inc. provided the GHG statement based on the requirements of the GHG Protocol for the period 01.07.2024 to 30.06.2025 were verified by SGS to a limited level of assurance, consistent with the agreed verification scope, objectives and criteria, as follows:

Location-based: 673,762 metric tonnes of CO2 equivalent (Scope 1, 2 and 3)
4,312 metric tonnes of CO2 equivalent for Scope 1
32,330 metric tonnes of CO2 equivalent for Scope 2 (location based)
637,120 metric tonnes of CO2 equivalent for Scope 3 (Categories 1,2,3,4,5,6,7,9,12,14,15)

Market-based: 641, 497 metric tons of CO2 equivalent (Scope 1, 2 and 3).
4,312 metric tonnes of CO2 equivalent for Scope 1
65 metric tonnes of CO2 equivalent for Scope 2 (location based)
637,120 metric tonnes of CO2 equivalent for Scope 3 (Categories 1,2,3,4,5,6,7,9,12,14,15)

SGS' approach is risk-based, drawing on an understanding of the risks associated with modeling GHG emission information and the controls in place to mitigate these risks. Our examination included assessment, on a sample basis, of evidence relevant to the emissions reporting.

SGS concludes with a limited level of assurance that the presented CO_2e statement is materially correct and is a fair representation of the CO_2e data and information and is prepared following the requirements of ISO 14064-1:2019. SGS concludes that the data is accurate, complete, consistent, transparent and free from material error or omission.

We have planned and carried out our work to obtain the information, explanations and evidence that we have considered necessary to conclude with a limited level of assurance that the GHG emissions for the period 01.07.2024 to 30.06.2025 are fairly declared. The audit methods used were virtual interviews with the corporate team, carried out during the month of **November 2025**, as well as the review of documentation and records. Data, calculations, and evidence for all locations was reviewed centrally.

The activity data presented is based on calculations and estimates, which are explained in the organization's report.

Considerations and Limitations

- Some international sites with no data available have been assumed as consumption 0, even though based on the representativeness it can be considered no material, the consumption should be survey or estimate for next year inventory.
- Waste expenditure was estimated in global sites based on average waste bills values in USA and on spend data using EEIO tool.
- Capital expenditure for estimating Category 2, was based on valuation of assets not on purchase value of capital goods in the reporting period.

This statement shall be interpreted with the "GHG Report" of the organization, as a whole.

Note: This Statement is issued, on behalf of Client, by ***SGS North America Inc.*** - 400 Broadacres Drive, Suite 200, 2nd Floor Bloomfield, N.J, 07003, United States of America. ("SGS") under its General Conditions for GHG Validation and Verification Services. The findings recorded hereon are based upon an audit performed by SGS. A full copy of this statement and the supporting GHG Report may be requested to **TAPESTRY Inc.** This Statement does not relieve Client from compliance with any bylaws, federal, national or regional acts and regulations or with any guidelines issued pursuant to such regulations. Stipulations to the contrary are not binding on SGS and SGS shall have no responsibility vis-à-vis parties other than its Client.
